About Me

Hi, I'm a front-end developer who can code all day without getting tired.

I started learning to code 1 year ago, and it only took six months for me to make money from my programming skills. I found my passion for programming in high school by modding Android, such as modding the status bar to two layers and making the input notification flash like neon lights...

In the past year, I have been very focused on learning front-end web programming. Now I am very confident that my abilities can meet your requirements. My goal for the future is to become a senior frontend developer.

Skills

Web Front-end Technologies:

- HTML5, CSS3, SEO
- Javascript , Typescript
- ReactJS , NextJS
- Redux, Redux thunk , React query
- Styled Components, TailwindCss, SCSS, MaterialUI, Bootstrap
- Webpack, Axios, Vite, Vitest, Mock Service Worker

Web Back-end Technologies:

- Protocols: REST, HTTP(S)
- Frameworks/Libraries: Node.js, Json server
- Database : MySQL , MongoDB

- Cloud Services: Vercel, AWS , Google Cloud , Firebase
- Other : Docker , JAVA OOP

Work Experience

Intern at App Cyclones software :

- Developed and maintained a responsive website for a local nonprofit organization using HTML, CSS, and JavaScript.
- Contributed to the development of an open source front-end framework by fixing bugs and adding new features.
- Freelanced as a front-end developer, building and maintaining websites for small businesses.
- Volunteered to develop and maintain the website for a local school.

Industrial & Interpersonal Skills

Write, Present, Teamwork, SEO, digital marketing.

Projects

1. Shopee clone

This is a project to clone the user page of the e-commerce platform [Shopee](#).

Technologies used : REST API, ReactJs, Typescript, Tailwindcss, React Router, React Hook Form, Yup, React Query, Vite, Vitest, Storybook, ESLint, Prettier, React Helmet

Functions include :

- Manage authentication with JWT (automatic token refresh applied)
- Use the Yup and React Hook Form to validate the form.
- Smart Pagination, Filter, and Product Search
- Incorporate state into the URL to easily share results across devices.
- Asynchronous state management with React Query
- Code Splitting
- Improve performance by optimizing build file size analysis.
- SEO with React Helmet
- Separate the private and public routes.

- Unit Test
- Manage components with Storybook

 **Github:** <https://github.com/nguyenleavu/shopee>

2. Vegadic - Vegetable Shop

This is an e-commerce web project that allows users to buy vegetables online.

Technologies used : REST API, ReactJs, Typescript, Tailwind Css, React Router, Formik, Yup, Redux , Redux-thunk, Firebase , Babel , Swiper , Lodash

Functions include :

- Manage authentication with JWT (automatic token refresh applied)
- Use the Yup and Formik to validate the form.
- Smart Pagination, Filter, and Product Search
- Incorporate state into the URL to easily share results across devices.
- Asynchronous state management with Redux
- Code Splitting
- Multiple language
- Improve performance by optimizing build file size analysis.
- Separate the private and public routes.
- Unit Test
